VEGETABLE PLANTS OF ALL KINDS**PREPARATION FOR AND CARE OF LAWNS**

Clear the ground of rubbish and stones, cover with agricultural lime on basis of 10 pounds per 100 square feet, 2,000 pounds to acre. Brak soil 6 inches deep, cover with Venable Lawn and Shrub Manure or some good Fertilizer on basis of 5 pounds to 100 square feet, 1,000 pounds to the acre. Harrow or rake both ways until the soil is in pulverized condition. Sow seed broadcast, preferably in four directions, on basis of 1 pound to 300 square feet, 75 to 100 pounds per acre. Rake lightly and roll, or smooth over with a shovel or pack with a board, leaving the surface smooth. Do not mow the first time until 3 inches high. Water and mow as needed. Remove all weeds as they appear and reseed bare spots.

About December 1 cover with tobacco stems, 50 pounds to 100 square yards. About March 1 remove the stems, reseed any bare spots and top dress with lawn fertilizer.

The best time of year to sow lawn grass is September and October or March and April.

Follow these directions and you will have a beautiful lawn.

PLANET JR. GARDEN TOOLS

Do you work your garden with an old-fashioned hoe or with modern tools like a Planet Jr.? If you could see one at work no argument would be necessary to convince you that you just had to have one. We have used them for more than thirty years and could not do without them.

No. 4 DRILL AND SINGLE WHEEL HOE

Opens the rows, plants the seeds either in continuous rows or in hills 4, 6, 8, 12 or 24 inches apart; covers the seeds to the proper depth, firms the soil over the seeds and marks the next row all at one operation. The seed flow can be instantly opened and shut off, and automatically shuts off when turning at the end of a row. Changes from hill dropper to continuous row seeder in a moment. The opening plow and coverers are adjustable for depth and the handles to suit the height of the operator. The seed hopper holds 2½ quarts.

Price.....

No. 4-D DRILL

Exactly like No. 4, but has no cultivating attachments.

Price.....

JIFFY SEEDER

A real seeder for both small and large gardens. It plants all seeds from the smallest up to beans; the hopper holds 1½ pints of seeds, but it will handle the contents of a 5c packet. It plants the seeds, covers to the desired depth and rolls, all at a single operation.

Price.....

No. 12 DOUBLE AND SINGLE WHEEL HOE

Will straddle the row and work both sides at once, or between the rows as you prefer. Has 2 hoes, 4 cultivator teeth, a pair of plows and 2 leaf lifters.

Price.....

No. 16 SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

Equipped with a pair of 6-in. hoes, 3 cultivator teeth, a large plow, 4-inch and 7-inch rakes and leaf guard. A splendid combination.

Price.....

No. 17 SINGLE WHEEL HOE

Exactly like No. 16, but has no rakes.

Price.....

No. 19 GARDEN PLOW AND CULTIVATOR

Has a cultivating tooth for deep work, a 10-inch sweep for shallow work, and a plow; 15-inch wheel.

Price.....

JIFFY HOE AND PLOW

A splendid tool for the small garden. Has a 3-prong cultivator attachment and a strong plow; it cultivates, plows and weeds. The handle is adjustable to any height.

Price complete..... Without plow.....

No. 119. Has a strong plow, two cultivating teeth, wide and narrow row, a reversible attachment with 3-toothed cultivator and scuffle blade for weeding and shallow cultivation. Wheel 24 inches high.

Price.....

FIRE FLY GARDEN PLOW

An exceedingly useful tool in the small garden and chicken yard.

Price.....

PLANET JR. SPEEDHOE

The rotating saw-toothed blades break up the lumps, thoroughly pulverize the soil and leave a moisture-retaining mulch; the scuffle blade gets all the weeds; when reversed you have a 3-tooth cultivator. Works like a lawn mower. 10-inch size.....

CYCLONE SEED SOWER

The Cyclone is a splendid seed sower that will pay for itself in a few days in the time it will save, besides sowing grass and clover seeds and grain of all kinds faster and more evenly and uniformly than is possible by hand. It will sow as fast as you can walk, and the quantity can be regulated to any amount to the acre.

Each.....
